

Software Engineer, Full Stack

Lisbon

Guuru's mission is to become the world's leading Customer Service Crowdsourcing Platform and fix the Customer Service industry.

Full Stack Engineers are an essential part of our Product Team. We take care of Guuru's infrastructure and we are the interface between Partners, Customers and guurus. We build libraries and abstractions to make our lives easier. We make the most of modern tools like React, ES6, and SASS, and we ensure our UIs work well on all screen sizes. Some of us specialize in frontend, some in backend, but all of us are JavaScript pros and full-stack engineers.

Responsibilities:

- Full stack web/mobile application development with a variety of languages including but not limited to node, JavaScript, HTML, etc.
- Implement web and mobile interfaces using React, React Native and CSS.
- Build and scale back-end services.
- Participate in design and code reviews.

Requirements:

- 2+ years of programming experience.
- 2+ years of experience with NoSQL.
- 2+ years of experience with web technologies: JavaScript, XHTML, CSS.
- Strong Computer Science fundamentals.
- Demonstrated design and UX sensibilities.
- Experience with some JS utility libraries: Lodash, moment, jQuery.
- Experience with source control (preferably git).
- A passion for the simple over the complex.
- Knowledge of Redux or Webpack is a plus.

Preferred Qualifications:

- B.S. or M.S. Computer Science or related field.
- Experience with node and react.
